## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of Invention I in the reply filed on November 28, 2005 is acknowledged.
2. Claims 5-29 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 28, 2005.

### *Drawings*

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "sliding cover having a substantially planar surface sized to substantially cover the opening in the housing" as set forth in claim 1, "the sliding cover includes one or more frictional ridges" as set forth in claim 2, "the sliding cover will maintain the push-button actuator in a depressed position" as set forth in claim 3, and "the sliding cover engages the housing through a tongue-and-groove interface" as set forth in claim 4 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 1 sets forth that the sliding cover is "sized to substantially cover the opening in the housing". Figure 1 of the drawings shows the opening in the housing as being a keyhole slot. Sliding cover is rectangular and of a size that would only cover the slot portion and not the keyhole. The cover cannot therefore "substantially cover the opening in the housing". The specification is therefore not enabling for this limitation.

Claim 2 sets forth "one or more frictional ridges". The specification and drawings only teach a "plurality of ridges". The specification is not enabling for one ridge.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
